

# How to tie your belt

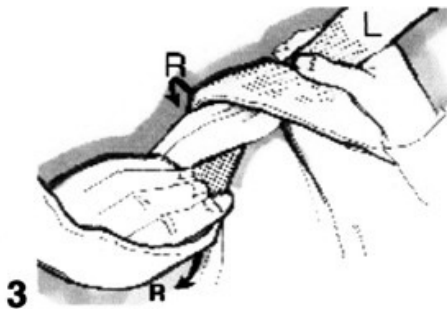

This guide matches the illustrations to your view looking down on the belt

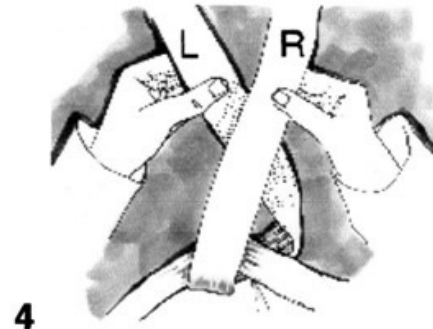

Wrap the belt around your waist and bring the two ends together, Left & Right as at 1.

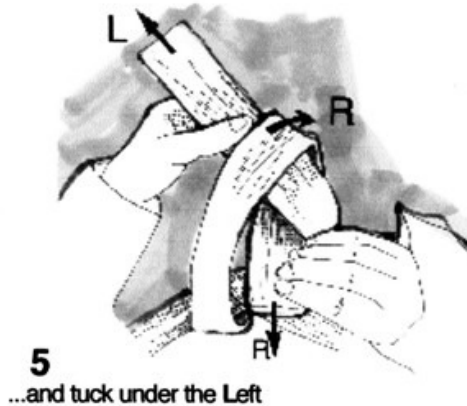

Bring the Right end across the Left (Right over Left)

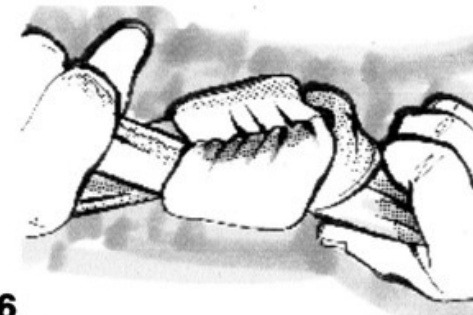

Take the Right end and bring it under and through the Left side of the belt, pull tight around your waist.

Bring the Right across from the Left...

...and tuck under the Left

...pull both ends ( L & R ) tight.
